The Jenks Hatchery Guarantee

Our Guarantee is Backed with 112 Years of Experience

We guarantee your shipment of chicks and poults will arrive 100% alive and in good condition.

On USPS orders for Cornish Cross, we place four percent extra.

On USPS orders for other varieties, there will typically be two percent extra.

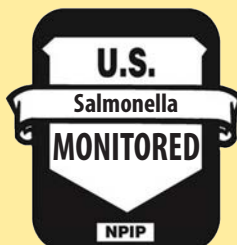

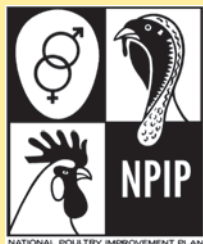

We guarantee 100% live delivery of poultry paid for. Please examine the poultry at the time of delivery to be sure they arrived in good condition. If the shipment arrived in poor condition, immediately notify us and, if the shipment was insured, immediately inform your postmaster.

Our Six Company Principles

The Jenks Hatchery Story

Founder E. M. Jenks

As we celebrate 112 years serving our customers, America's oldest family-owned hatchery draws upon the past and looks to the future.

The Jenks family has roots in Oregon that reach back to the end of the American Civil War. In 1866, Oregon Trail pioneers James Benton and Mary Callaway Jenks made their way from Missouri to the Willamette Valley and established a farm in Linn County, Oregon.

The fertile land and mild climate provided James Jenks with opportunities not available in the Midwest, and both the farm and the family flourished. Raising nine sons and one daughter, James and Mary made the farm their home through the end of the 19th century and into the 20th.

In 1910, their son Enoch Marvin "E. M." Jenks established Jenks Hatchery on that same property. As a young man of 30, E. M. had a vision that he could create a successful business by breeding and hatching only the finest poultry. At that time, the hatchery industry was in its infancy, but the work ethic he honed on the farm proved advantageous, and over the years, through careful management, hard work and an eye toward constant improvement, his vision became not only a reality, but a thriving business.

From the beginning E. M. knew that his success was dependent on the success of his customers. "Your interest, your patronage, and your success is our highest aim," he wrote in 1929. "We want you to feel free to call upon us at any time."

As Jenks Hatchery grew, so did the involvement of the Jenks family. In the late 1930s, E. M. Jenks' two sons, Marlowe and Melvin, joined the business. Each son added his expertise in the development of poultry technology and marketing.

Throughout the 1940s, '50s and '60s, Jenks Hatchery continued to expand and improve, adapting new methods and embracing new technologies with one goal in mind, continuing to increase the quality of their chicks for the benefit of their valued customers. By the mid-1940s, Jenks was hatching and shipping over a half million chicks and poults every year.

E. M. Jenks died in November 1969, but not before a third

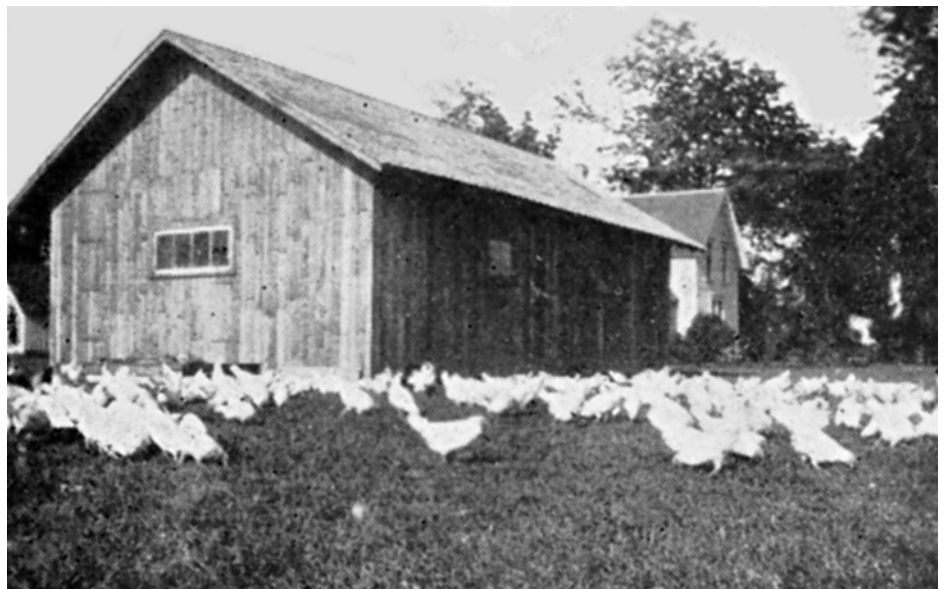

generation, first-cousins John and Larry Jenks, had the opportunity to continue in the family tradition.

The years presented challenges, as well. In 1973, a disastrous fire destroyed the incubator equipment and practically the entire interior of the hatchery. But like the mythical phoenix, Jenks rose from the ashes, installing new incubators in a new steel building. As is often the case, adversity led to opportunity, and new equipment produced an even better product.

For Jenks Hatchery, family-owned also means family-run and E. M. Jenks' grandchildren, John Jenks and Larry Jenks continue to be heavily involved in the daily operation of our 200 acre facility.

You'll also find a fourth generation, E. M.'s great-grandchild, Aaron, managing the operation, having graduated from Oregon State University in June 2014 studying poultry science. His wife Katie is the Office Manager and is quickly learning the ins and outs of the business, as well. You may talk to her if you call to ask a question or place an order. Aaron and Katie had their daughter, and first child, the 5th generation Jenks, in February of 2021, and are hoping that she too will someday become involved in the family business.

Jenks Hatchery continues to embrace the technologies and opportunities of the 21st century while applying the poultry practices that have made the Jenks family name synonymous with quality chicks and poults. The ability to draw upon a century of knowledge and experience and combine it with contemporary methods and perspectives makes Jenks

The original hatchery building at Jenks, as it looked in 1923.

Grandsons John and Larry, and great-grandson Aaron were featured in a 2019 article in the Albany (Oregon) Chamber of Commerce Powerbook.

E.M.'s sons Marlowe (left) and Melvin, 1954.

Hatchery unique in the poultry industry.

You might be surprised to know that, more than a century later, we continue to use many of the practices and processes set in place by our grandfather and fathers. We've learned from the best and, combined with the latest poultry technology, shipping innovation and ingenuity, we continue to improve our methods and products.

Improvements in technology also mean a better experience for our customers. Today, you can submit your order from your computer or smart phone, see real-time hatch dates, product inventories and shipping information, text us your questions and concerns and "follow" us on social media. But one thing hasn't changed. When you call us, you will still talk to one of the owners or a team member located right

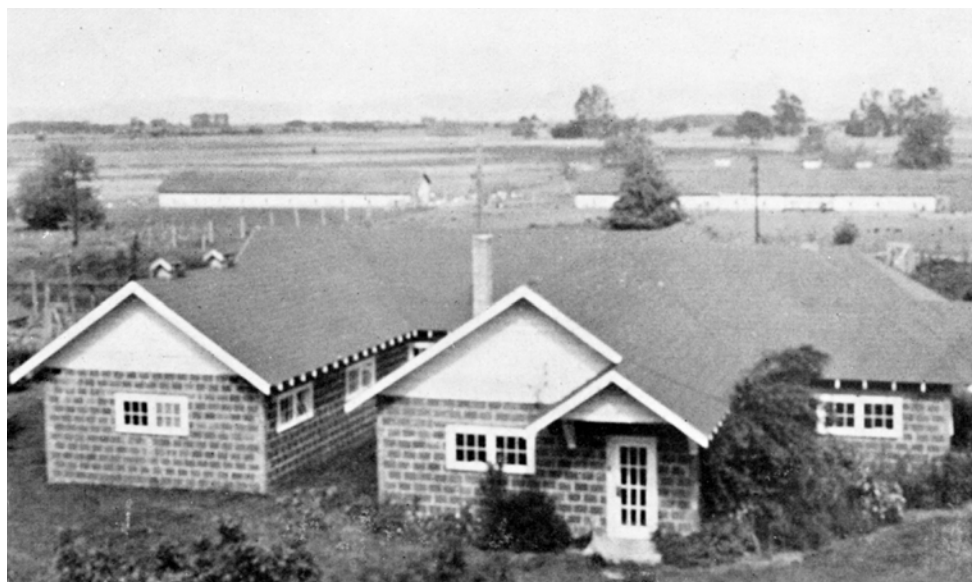

here
in our Tangent, Oregon facility.

Over the last century, many businesses have come and gone, but our family farm has stood the test of time. We

will continue to deliver the highest quality chicks and poults and we will be here tomorrow to stand behind the products we sell today.

We are proud that the Jenks Hatchery name has come to represent trust and delivering the highest quality poultry. Just ask our customers! E. M. Jenks said it best over 80 years ago: "It is our belief that a person who is perfectly satisfied with a product will also become that products' finest advertiser."

We are grateful to the customers who have made Jenks Hatchery a success for 112 years. If you are looking for strong, healthy grow-out and a company with a century-long, proven track record of delivery, buy your chicks and poults from us!

The new hatchery building as it looked in the 1940s.

Your Local Source for All Things Poultry

Convenience is key as our Feed Warehouse offers high-quality feed products and supplies for pickup with your chicks and poults.

Jenks Hatchery is pleased to announce the completion of our improved Local Pickup Facility which will allow us to more efficiently serve our pickup customers.

We are also excited to offer an excellent line of feed products in this same location. We have teamed up with some of the best local feed mills to offer a wide variety of feed products, all in one place, at affordable prices!

Feed products from CHS-Payback, Mosaic Farms, and Union Point Custom Feeds are now in stock

for pre-order pickup, will call, or point of sale (POS), continuing year round. Feed products can be ordered online for pickup every week throughout 2022. This gives our customers the option of saving time by picking up their chicks or poults and feed at the same place and time!

Feed products may be ordered ahead and picked up with chick orders or poult orders on Wednesdays. Three additional days, Monday, Thursdays and Fridays, will be available for feed pickup only.

Pickup orders are by appointment only, Mondays, Wednesdays, Thursdays and Fridays, at 12:00pm, 2:00pm or 4:00pm. (Our local pickup warehouse is not a continuously staffed retail location.)

Select products are also available for POS pickup at our facility on the hatch date, if you forget to order feed ahead of time. Stock is limited to inventory on hand. Local pickup point of sale options are available only to customers already picking up chicks or poults. Just ask us which products are

available for immediate pickup when you arrive for your chicks or poults.

To order feed products, go to our website at www.jenkshatchery.com and click on the ORDER FEED FOR LOCAL PICKUP button.

From there, you can place an order for a pickup date within two weeks of the current date, or you can pre-order for multiple pickup

dates more than two weeks out.

If you would like to order a bulk bag (in 1,000lb or 2,000lb totes) please call us at 541-928-8928 to schedule your order. Discounted pricing is available.

If you want to order a product that is out of stock or need more product than is currently available, some products may be eligible for special order to be picked up

within the next two weeks, even if they are currently out of stock. Please call us if you would like to check the eligibility of a special order product, a low inventory product, or an out of stock product. Read our feed pickup policies, available on our website, for more details.

Feed pricing is updated regularly and is based on current market prices. An order will receive the

JTS Animal Bedding

and supplements, as well as electrified poultry netting and fencing, and everything in between. If you need it to successfully raise poultry, we carry it. As our feed warehouse slogan states, we truly strive to be "your local source for all things poultry."

All poultry supplies are available for pick-up via point of sale, or reserved for the same pickup days and times as feed products. All the Premier 1 Supplies products we offer can also be ordered on our website for immediate shipment.

We look forward to seeing all of our local pickup customers at the Jenks Hatchery Feed Warehouse this season!

Kubic Feeders

Heat Lamp Starter Kit for Chicks

Automatic Poultry Door

Aquila

The Aquila is a cousin to the Sagitta. This bird is mostly black with a small amount of Red tint in the feathers. This breed was also founded and developed by Henry Saglio.

The males will be around 5 lbs in 12-13 weeks making the Cockerels perfect for the frying pan at an early age. At 16 weeks the hens will be around 5-5.5 lbs live weight. This is a hardy breed, well suited for pastured poultry producers. Give this black broiler a try!

Sold as straight run only.

Minimum quantity: 5 (may be combined with any other broiler variety, to meet minimum quantity of 10 broiler chicks).

Order minimum per hatch date: Local, Zone 1: 10; Zone 2-6: 25

- Growout Time: 12-16 weeks
- Live Weight Target: 5-6 lbs
- Processed Weight: 3.0-4.0 lbs
- Skin Color: Yellow

Order online at www.JenksHatchery.com

White Bantam Silkie

This breed is a true Bantam Silkie Asian Broiler, traditionally raised for meat production in Asia and desirable for specialty meat markets and high end restaurants. They will reach an average live weight of 3.5 lbs in 12-15 weeks.

With black skin, black bones, green to bluish-black earlobes, and very dark meat, this variety plucks easily and has a refined taste and texture.

The White Bantam Silkie originates from an ancient breed line. Known as a rather unusual variety, the White Bantam Silkies are widely regarded for their docile disposition, and attentiveness to their offspring. For this reason, Silkies can set on their own eggs and hatch their own chicks at a very respectable rate. They will even set on other birds' eggs and hatch them.

Females will lay between 90-120 cream-colored eggs per year.

Roughly half of the birds will have a top crest, and the other half will not. This is because of cross breeding.

If you are looking for a rather unusual variety, try the White Bantam Silkie. Sold as straight run only.

Chicks are predominantly white. On occasion, other chick colors may be present, however due to the infrequency of different colors, no color choices or substitutions will be allowed.

*This breed will not breed true if crossed.

Minimum quantity: 5 (may be combined with any other broiler variety, to meet minimum quantity of 10 broiler chicks).

Order minimum per hatch date: Local, Zone 1: 10; Zone 2-6: 25

- Breed Origin: Asia
- Broiler Type: White
- Growth Rate: Slow
- Breedline Type: Hybrid
- Ear Color: Green/Blue
- Growout Time: 12-14 weeks
- Live Weight Target: 3.5 lbs
- Processed Weight: 2-2.5 lbs
- Skin Color: Black

Integrity Is Our Cornerstone
We strive to always do what is right, and choose to go the extra mile for our customers!

Barred Rock

Also known as a Barred Plymouth Rock, this breed is often considered an American staple, when referring to poultry breeds.

This breed is known to be active, lays approximately 280-290 large brown eggs per year, and will make a great addition to your flock! Our Barred Rock will out lay and out perform any other Barred Rock strain on the market, due to its' high production and selective breeding program.

As this is a cross breed, the Barred Rock, will not breed true if crossed. Hens will typically reach 7 to 7.5 lbs and Roosters will reach a whopping 9.5 lbs. As such, the cockerels also make a good choice for meat production.

Available as sexed pullet chicks, cockerel chicks, or straight run chicks.

Minimum quantity: 5 (may be combined with any other egg layer variety, to meet minimum quantity of 10 egg layer chicks).

Order minimum per hatch date: Local, Zone 1: 10; Zone 2-6: 25

- Breed Origin: U.S., Czechoslovakia
- Egg Production: 280+ Annually
- Hardiness: Cold Tolerant
- Egg Color: Brown
- Matures: 20 weeks of age
- Sexable by: Feather
- Egg Size: Large to Extra Large
- Bird Size: Heavy 6 lbs+

Order online at www.JenksHatchery.com

Blue Sapphire Plymouth Rock™

This unique breed resembles the Blue Plymouth Rock and Blue Andalusian breeds and is imported from the Czech Republic.

A proprietary high production cross of a native Andalusian male and a Plymouth Barred Rock female, this breed will thrive on any homestead! With a feather color that is bluish gray with flecks of black, it will produce 290+ large to extra large brown eggs per year.

Color sexable at hatch, and available as sexed pullets.

This breed will not breed true if crossed

Minimum quantity: 5 (may be combined with any other egg layer variety, to meet minimum quantity of 10 egg layer chicks).

Order minimum per hatch date: Local, Zone 1: 10; Zone 2-6: 25

- Breed Origin: Czechoslovakia
- Egg Production: 290+ Annually
- Hardiness: Heat & Cold Tolerant
- Egg Color: Brown
- Matures: 20 Weeks
- Sexable by: Color
- Egg Size: Large-XL
- Bird Size: Large, 5+ lbs

ColorPack Layer™

This variety is a proprietary high production cross of several breed lines, which will yield 280+ predominantly blue and green, colored eggs per year.

Most pullet chicks are brown with dark stripes, but some may also be red with yellow mottling, or even, lighter brown, almost buff, and occasionally, solid yellow.

Most hens will feather out to be a rust or reddish brown color, with some darker striping, closely resembling their Cream Legbar ancestry, but some may also be cream colored. Thanks to the Cream Legbar traits, ColorPack hens will develop a top crest and will lay blue, green, brown, and even pink tinted eggs!

The reason that we refer to our breed as the ColorPack, is because this breed will make a perfect addition to your colored egg assortment of layers, truly helping you achieve a "color-pack" carton of eggs. Even though this may sound like an Easter Egger type cross, this bird is not related in any way to the Americana, or Araucana lines.

This breed will not breed true if crossed

Minimum quantity: 5 (may be combined with any other egg layer variety, to meet minimum quantity of 10 egg layer chicks).

Order minimum per hatch date: Local, Zone 1: 10; Zone 2-6: 25

- Breed Origin: Czechoslovakia

Our prices always include free shipping and Marek's vaccinations, plus 112 years of knowledge and experience.

**Blue Sapphire Plymouth Rock™
and ColorPack Layer™ Hens**

Dominant Copper

This unique breed, imported from the Czech Republic, is a proprietary high production cross between a Black Copper Maran male and a Barred Rock female. With a feather color which displays its Black Copper Maran heritage, this breed forages well. It will produce an impressive 290+ large copper-to-dark chocolate-colored eggs per calendar year, which is exceptional for a breed that lays dark eggs.

Some birds will have feathered feet, while others will not. This is a byproduct of cross breeding.

Throughout the lifespan of this breed, egg color will transform. You can expect to receive some very dark colored eggs but may also receive lighter colored brown eggs from time to time. The range of color shades is part of what makes this variety so unique!

The Dominant Copper is an excellent balance of beautiful eggs and efficiency.

Color sexable, and available as sexed pullet chicks or cockerel chicks.

*This breed will not breed true if crossed.

Minimum quantity: 5 (may be combined with any other egg layer variety, to meet minimum quantity of 10 egg layer chicks).

Order minimum per hatch date: Local, Zone 1: 10; Zone 2-6: 25

- Breed Origin: Czechoslovakia
- Egg Color: Dark Copper, Chocolate Brown, Mottled and Speckled Brown
- Egg Size: Large-XL
- Egg Production: 290+ Annually
- Matures: 20 Weeks
- Bird Size: Medium, 4-4.5 lbs
- Hardiness: Heat & Cold Tolerant
- Sexable by: Color

Customer Service Is Our #1 Priority

NOVOgen Brown

The NOVOgen Brown is a Red Sex-Link. This particular breed has been developed in France, derived from a cross between Rhode Island Red and Leghorn genetics. The NOVOgen Brown is a brown egg-layer which produces a beautiful large to extra large dark brown egg.

- A prolific egg-layer
- Estimated 395 eggs in 72 weeks of lay, ~300 eggs per year
- 50 percent production at week 20
- Peak production 93-95 percent
- Excellent feed conversion ratio
- Easy to manage, calm disposition
- Excellent shell strength with dark brown eggshell coloring
- Has been bred to adapt to different conditions, allowing them to produce well in housing or to thrive on free range.

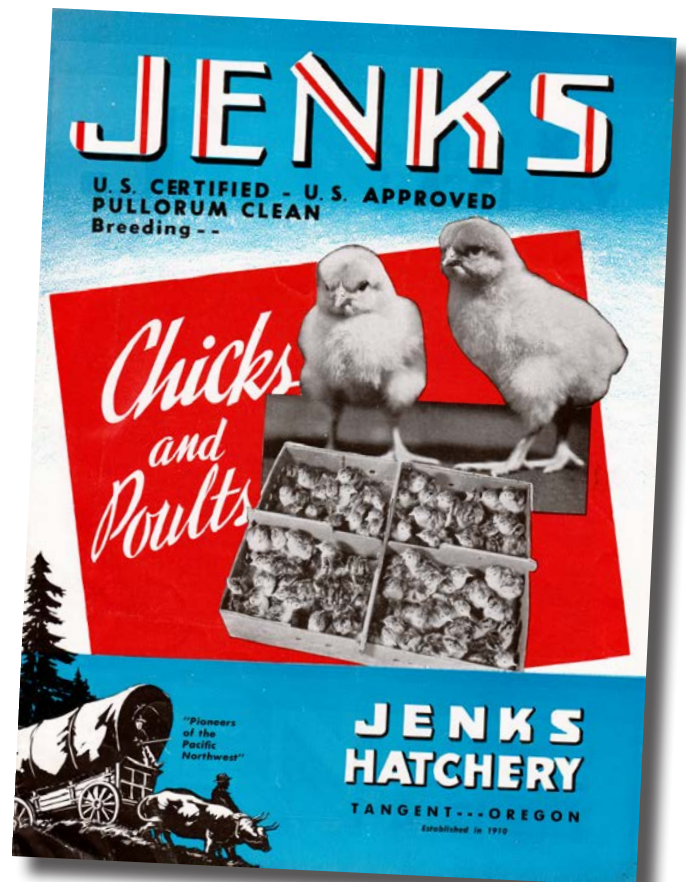

Available as color sexed pullet chicks or cockerel chicks.

*This breed will not breed true if crossed.

Minimum quantity: 5 (may be combined with any other egg layer variety, to meet minimum quantity of 10 egg layer chicks).

White Leghorn Hen

Broad Breasted Black

Black turkeys are a striking addition to our hatchery line-up. They have a deep, dark, coloration that makes them one of a kind.

Black turkeys originated in Mexico and were taken to England in the 16th Century where they gained popularity with the local farmers. The early colonists took them to the New World to raise for food. The turkey consumed at the first Thanksgiving just might have been a Black turkey, rather than a native wild turkey.

Our Broad Breasted Black turkey, is a hybrid breed, and will reach 20-22 lbs live weight in about 16-18 weeks.

TOMS - Live: 27.17; Dressed: 20.38

HENS - Live: 17.15; Dressed: 12.86

Minimum quantity: 5 (may be combined with any other turkey variety, to meet minimum quantity of 10 turkey poults).

Order minimum per hatch date: Local, Zone 1: 10; Zone 2-6: 25

- White skin, with dark spots
- Smaller frame, but still considered broad breasted
- Forages exceptionally well
- Reaches 20 lb live weight in approximately 16 weeks
- Can be raised for meat production or backyard purposes

We Stand Behind Our Products

We take a great deal of pride in what we do. If we can't guarantee quality, then we won't sell it.

Enoch Jenks started his hatchery in 1910 using one of these incubators, which held 140 eggs and was heated by a kerosene lamp.

Broad Breasted Bronze

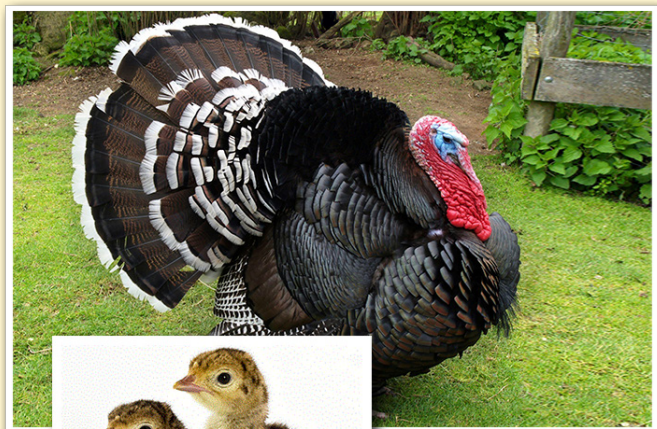

Introduced from England to Canada in the 1900s, then to the Western US and crossed with US stock. This was the commercial turkey of choice before the Broad Breasted White. Beautiful bird that will reach 20-plus pounds in 20 weeks depending upon diet.

Available as straight run only.

Minimum quantity: 5 (may be combined with any other turkey variety, to meet minimum quantity of 10 turkey poults).

Order minimum per hatch date: Local, Zone 1: 10; Zone 2-6: 25

- White skin, with dark spots
- Large frame, resembles traditional turkey
- Reaches 24 lbs in approximately 16 weeks
- Pastures well
- Good alternative to the Broad Breasted White
- Recommended for meat production

Broad Breasted White

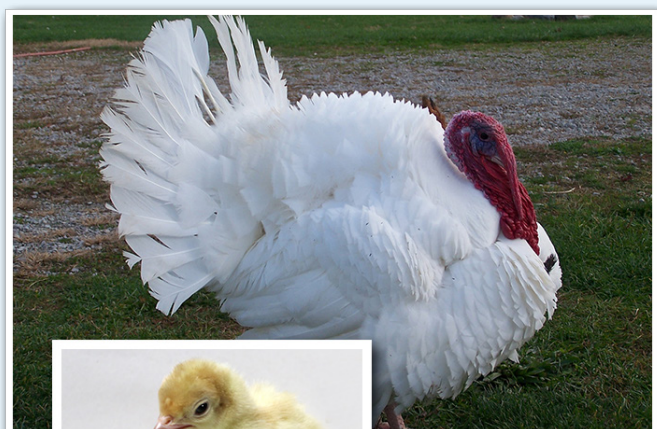

Top commercial bird today. Bred originally from the White Holland and the Broad Breasted Bronze. This bird can reach 20-plus pounds in just 18 weeks and is a beautiful white color.

Available as straight run only.

Minimum quantity: 5 (may be combined with any other turkey variety, to meet minimum quantity of 10 turkey poults).

Order minimum per hatch date: Local, Zone 1: 10; Zone 2-6: 25

- White skin, large frame
- Reaches 22 lb liveweight, in approximately 16 weeks
- Bird of choice for efficient pastured turkey production
- Easy to pluck
- Recommended for meat production

Sonoma Valley Classic

Bred from the Nicholas turkeys which originated in the Sonoma Valley in California, this specialty breed is sure to be the talk of any cook-out.

The Sonoma Valley Classic is an outstanding, smaller framed turkey, perfect for barbecues! Unlike is often the case with the Broad Breasted White, the Sonoma Valley Classic, once processed, will fit in your Traeger, oven, or freezer!

The meat is juicy and tender, and the small frame carcass is easy and fast to grill.

This bird will reach 20 lbs live weight in approximately 26 weeks, or 12-14 lbs live weight in 14-16 weeks, perfect for roasting or smoking. Give this bird a try, we know you won't be disappointed!

Minimum quantity: 5 (may be combined with any other turkey variety, to meet minimum quantity of 10 turkey poults).
Order minimum per hatch date: Local, Zone 1: 10; Zone 2-6: 25

Broad Breasted Bronze

FAMILY PORTRAIT. Here are six junior poultrymen who are eternally fascinated with the thousands of cute little baby chicks and turkey poults that come out of the hatching at Jenks Hatchery. Left to right; Greg, Sharon, Lyn, Timmie, Gary and Ann. Next year we'll show you the Jenks children again . . . but there will be two more! Watch them grow each year in your Jenks catalog.

This ad appeared on the back of our 1954 catalog. It's just as true today.

A HEAD START FOR YOU AND YOUR FLOCK

You are off to a better start and a more successful flock when you begin with the best chicks and poults. If the breeding is not in them, you can't expect them to produce. That's why you should buy from Jenks Hatchery, where your chicks and poults are skillfully hatched in the most modern equipment by experienced hatcherymen. Jenks chicks and poults are huskier, full of vim and vigor . . . with generations of Championship breeding behind them. They are U.S. Pullorum Typhoid Clean.

With proper care and management your Jenks flocks will produce more eggs and more pounds of meat for you . . . and that means more money in your pocket.
